PROFESSIONAL SUMMARY

Results-driven Computer Science Engineering graduate (2025) with hands-on expertise in Java Full Stack Development. Skilled in building scalable, maintainable web applications using Spring Boot, REST APIs, MySQL, and JavaScript. Demonstrated ability to deliver measurable results — reduced manual effort by 40% through CRUD automation and improved data integrity by 35% via blockchain-based hashing. Strong understanding of the full software development lifecycle (SDLC), object-oriented programming (OOP), and agile development practices. Eager to contribute backend and full-stack expertise in an entry-level software engineering role.

TECHNICAL SKILLS

Programming Languages: Java, SQL, Python

Web Technologies: HTML5, CSS3, JavaScript

Backend Frameworks: Spring Boot, REST API Development

Database Management: MySQL

Version Control & Tools: Git, GitHub, VS Code, Eclipse IDE, Vercel

Cloud & Infrastructure: Cloud Computing (IaaS, PaaS, SaaS), Secure Cloud Architecture

Concepts & Methodologies: SDLC, Data Structures & Algorithms, DBMS.

INTERNSHIP EXPERIENCE

Java Full Stack Development Trainee

Qspiders Training Institute, Arumbakkam, Chennai | May 2025 – Apr 2026

- Completed intensive training in Core Java, Advanced Java, SQL, Spring Boot, JDBC, HTML, CSS, and JavaScript.
- Developed a Personal Budget Tracker application (Java + MySQL) with full CRUD functionality, automating expense entry and reporting and reducing manual tracking effort by 40%.
- Built an Employee Management System REST API using Spring Boot and MySQL, replacing error-prone Excel-based HR workflows with a scalable, database-driven solution.
- Designed and consumed RESTful APIs, practising industry-standard software engineering patterns including MVC architecture and layered service design.

Cloud Computing Intern

The Mind IT Solution, Tiruchirapalli, India | Jul 2024 – Aug 2024

- Automated cloud infrastructure configurations across IaaS, PaaS, and SaaS models, improving deployment efficiency by approximately 30% and reducing provisioning time.
- Implemented cloud cost optimisation strategies including rightsizing and scheduling policies, cutting resource usage by 20%.
- Designed and documented secure cloud architecture patterns, enhancing the internal team knowledge base and contributing to best-practice guidelines.

PROJECTS

Blockchain-Enabled File Storage System

Final Year Project – Anna University | Feb 2025 – Jun 2025

- Designed and implemented a decentralised file storage system using SHA-256 blockchain hashing and immutable audit trails, increasing data integrity verification accuracy by 35% compared to conventional database storage.
- Developed tamper-proof storage with automated integrity check alerts, eliminating single points of failure in the data verification pipeline.
- Tech Stack: Java, Solidity (Ethereum Blockchain), MySQL

Personal Budget Tracker (Java + MySQL)

Mini Project | Jun 2024 – Jul 2024

- Built a console-based budgeting application with full CRUD operations for income and expense management, reducing manual data entry effort by 40% versus spreadsheet-based methods.
- Implemented category-wise monthly reporting module, enabling users to visualise spending patterns through structured tabular output.

Employee Management System (Spring Boot REST API)

Mini Project | Mar 2024 – Apr 2024

- Developed a fully functional Spring Boot RESTful backend supporting Create, Read, Update, and Delete (CRUD) operations for employee records.
- Integrated MySQL persistence using JPA/JDBC with indexed lookups, improving query response time for large employee datasets.

EDUCATION

Bachelor of Engineering – Computer Science and Engineering

Arasu Engineering College, Kumbakonam (Anna University) | Jan 2021 – May 2025

- CGPA: 7.54 / 10.0
- Relevant Coursework: Data Structures and Algorithms, Object-Oriented Programming, Database Management Systems (DBMS), Web Development, Cloud Computing, Computer Networks, Software Engineering.
- Participated in intercollegiate coding contests, tech seminars, and industry-relevant workshops. Completed practical labs in Java, database systems, and network fundamentals.

CERTIFICATIONS

- Java Full Stack Development — Infosys Springboard (Aug 2024)
- Python Essentials 1 — Cisco Networking Academy (May 2025)
- Cisco CCNAv7 – Networking Fundamentals — Cisco Networking Academy (Sep 2025)
- Software Engineering Job Simulation — Wells Fargo via Forage (Jun 2026)
- Data Analytics Job Simulation — Deloitte via Forage (Jun 2026)
- TATA GenAI Powered Data Analytics Job Simulation – Forage (May 2026)
